

Press Release

EDF Polska selects Sword CTSpace software applications for document control and collaboration on all Polish operations.

Frankfurt, Germany, March 18th 2010 – Sword CTSpace, global provider of project document control and collaboration solutions for the design, engineering and construction of capital-intensive projects, today announced that they will be working with EDF Polska on all their sites in Poland.

EDF Polska is part of EDF Group, one of the three largest energy companies in Europe. The Polish unit provides a total generating capacity of more than 3000MWe and it is responsible for the co-ordination and piloting of manufacturing and service companies belonging to the EDF Group in Poland.

EDF Polska controls 7 power and hot water plants in Poland. With continual investment in mind, all the technical documentation for their projects needs to be stored in a safe but easily accessible way.

EDF Polska selected Sword CTSpace software applications for project document control and collaboration with contractors and sub contractors for the design phase and construction phase for all projects to be completed in Poland.

About Sword CTSpace

Sword CTSpace provides document control, cost management and business process automation solutions to companies with capital assets to design, engineer, construct and maintain in any location in the world. More than 145,000 professionals on 13,000 projects in 56 countries benefit through online collaboration, enabling their companies to improve internal and external communications and demonstrate measurable business benefits. Solutions are available as SaaS or by extensions to the major ECM solutions. For more information, please visit www.sword-ctspace.com
