

UPGRADE YOUR BUSINESS

SwordCTSpace

Corporate Background

Sword CTSpace, a global leader in Engineering and Construction Content Management

Sword Group

SwordCTSpace forms part of the **Sword Group**, an global technology company specialising in the delivery of high value business applications to regulated industries. Sword Group has been ranked 127th in Software Magazine's Software 500, a ranking of the world's largest software and service providers. In the same report the group also has been highlighted as a top performer with 23% year-on-year growth. In Europe, Sword Group is ranked as the 13th largest software company.

Sword CTSpace

SwordCTSpace provides document management, workflow & collaboration applications to the construction and engineering industry that increase the efficiency and reduce the risks in managing a built asset throughout its entire lifecycle.

Our solutions, available 24/7 all over the world, are used by organisations involved in project management, engineering design, construction management, and asset operations. By utilising our solutions, architects, engineers and contractors are more effectively managing programmes and projects, with clear and tangible benefits to their operations such as:

- Improved project communication
- Full transparency across the project
- Enhanced ability to manage schedules and risks
- Improved regulatory compliance

Sword CTSpace Solutions

SwordCTSpace is unique in offering both online software as a service (SaaS) solutions and on premises enterprise solutions, the latter of which leverage an organisation's existing investment in leading ECM platforms.

FusionLive - Project Content Management

SaaS based Project Collaboration solution, specifically designed for the construction & engineering industries. Available to all project participants across the supply chain.

FusionEnterprise - Engineering Content Management

On premise Document Management & Enterprise Content Collaboration solutions that leverages the world's leading DMS systems to manage the Engineering & Construction Content of an Enterprise:

- FusionEnterprise for IBM® FileNet P8®
- FusionEnterprise for Microsoft® Sharepoint®
- FusionEnterprise for Cimage
- CADTop, an optional product for FusionEnterprise that provides a seamless integration of AutoCAD/Microstation with the ECM system of choice

When deployed in tandem, our solutions provide an integrated environment based on best practice templates that support a project through its entire lifecycle: from design (content in process), through construction (active content) and into operation and maintenance (historical content).

SwordCTSpace's Services

We are engineering and construction content management experts. Whether we are supporting the rapid deployment of our SaaS solution, or executing on a fully integrated on premise enterprise solution, the SwordCTSpace Services organisation stands ready to exceed your expectations.

Our team offers a full range of consulting services around the design, implementation, and support of your engineering content management solution.

Solutions Design to meet clients requirements

SwordCTSpace Services is prepared to architect a solution that ensures customer success and a superior ROI. Our system architects are experts in integrating the Fusion product suite into an organisation's existing infrastructure and DMS platform. Our Business Consultants offer years of hands on experience in the areas of program, project, and content management. These exceptional professionals will assist you in developing a solution that is configured to compliment both your business needs and systems requirements. Our team will evaluate your current environment against best practices and the SwordCTSpace applications suite to offer the optimal solution for your organisation.

Proven Implementation Methodology

From two days to six months, "in the cloud" or "behind the firewall": we can setup systems in a matter of hours using our predefined templates and we can also spend long periods customising systems to meet clients every need. Our project managers and implementation specialists use our proven implementation methodology to ensure the successful, timely, and cost effective deployment of your engineering content management solution. Our team will lead your organisation through the entire implementation lifecycle: detailed design, planning, custom development and integration, test, production release, and end user adoption.

Worldwide Support

SwordCTSpace Support is worldwide, world class. Online, by phone, or at your facility, we take great pride in standing by our customers and our solutions.
